Products &

Services: Develops, manufactures, and sells finished dietary supplements (including private label) and novel, innovative specialty mineral ingredients for the food and dietary supplement industries using ionic mineral nutrients from Utah's Great Salt Lake.

Established:

Officially incorporated in 1995 by the Anderson family; prior to that, the Anderson family founded and managed a separate company from 1969 to 1998, at which time it was sold. The Andersons have nearly 40 years experience in the natural products industry.

Highlights:

- Family-owned and operated dietary supplement manufacturer and ingredient supplier based in Ogden, UT
- The mission of MRI is to improve global well being through mineral-based nutrition. The Andersons' strive to develop the mineral nutritional bounties of the Great Salt Lake with honesty, integrity and respect for the benefit of our customers, employees, and family.
- Various sea mineral concentrate products Self-Affirmed Generally Recognized as Safe (GRAS), April 2006
- In 2006, announced expansion into U.S. natural products and dietary supplement markets
- Launched expansion into mineral ingredients sector of the U.S. and international food and beverage marketplace in 2006
