**Mineral Resources International, Inc. Introduces Anderson's
Concentrated Mineral Drops**

***The Original Formula, All-Natural, Low-Sodium, Full-Spectrum Mineral
Supplement from Utah's Great Salt Lake.***

***Made with love and care from the Hartley Anderson family who did the
research and invented trace mineral supplements from Utah's Great Salt
Lake***

July 29, 2008 Ogden, UT — Mineral Resources International, Inc. (MRI) is pleased to introduce **Anderson's™ Concentrated Mineral Drops (CMD)**, an all natural, very low sodium sea mineral concentrate from Utah's Great Salt Lake. Anderson's is rich in magnesium, an essential mineral, and naturally contains the full spectrum of naturally occurring elements in trace and ultra-trace amounts for body balancing and full spectrum resonance.

Anderson's CMD is the original quality mineral concentrate invented by the Hartley Anderson family, who have been manufacturing and selling Great Salt Lake-based mineral based supplements since 1969. Anderson's CMD is made through the family's all-natural, solar-evaporation process, which is energized by all four seasons and typically takes a full two years to produce.

Anderson's CMD features a beautiful, cobalt-blue glass bottle with a measured glass pipette dropper trip with printed incremental measurements to ensure quick, accurate dosing. New and improved dosing recommendations make it easy to spread consumption throughout the day for improved absorption and retention.

Anderson's CMD is GRAS (Generally Recognized as Safe), Kosher-certified, and passes the U.S. Food Chemicals Codex's heavy metals safety test. The MSRP is \$18.98.

nutritional supplements in liquid, tablet, and powder delivery forms integrating naturally occurring minerals and trace minerals harvested from Utah's Great Salt Lake. Through its close relationship with Northshore Limited Partnership, its exclusive supplier and the only government-inspected, food-grade, solar evaporation mineral harvester on the Great Salt Lake, MRI, Inc. goes to great lengths to ensure an all-natural, GRAS (Generally Recognized as Safe)-certified mineral and trace mineral product while maintaining consistent standardization, concentration, and balance in each lot of product produced. MRI, Inc. manufactures a complete line of innovative dietary supplements ranging from multi-vitamins to targeted nutritional formulas using all-natural ionic minerals. In addition, MRI, Inc. provides a complete portfolio of natural ionic mineral ingredients for use in supplement, functional beverages and foods. MRI's products are sold worldwide through a variety of distribution channels including natural products and specialty retail stores, salons and estheticians, and natural health care practitioners.
