MRI's FortiSalt Receives Kosher Certification; Complete Line of All-Natural, Premium Liquid Mineral Concentrates Re-Certified

December 16, 2008, Ogden, UT — Dietary supplement manufacturer and mineral ingredient supplier Mineral Resources International, Inc. (MRI) announced today that its patent-pending FortiSalt Gourmet Mineral Supplement has received Kosher certification. Further, the complete line of MRI's premium, all-natural liquid mineral concentrates and blends including Anderson's Concentrated Mineral Drops™, OmniMin™, elete Electrolyte Add-In™, and Sea Salt Liquid, sold as dietary supplements and available as a premium mineral ingredient in foods, beverages or supplements, were re-certified as Kosher.

"As the sole manufacturer of all-natural, solar-evaporated mineral and trace mineral concentrates, we aspire to create handcrafted mineral blends of unmatched quality. Kosher certification is one of the certifications standing behind our products, and we are very pleased to offer Kosher-certified products to our customers," said Chieko Anderson, MRI's Product Development and Quality Assurance Specialist. "With the certification of FortiSalt now, MRI can now state that our complete liquid mineral line is Kosher certified."

The Kosher certification also extends to private-label customers and/or other food and supplement manufacturers purchasing premium liquid mineral ingredients from MRI.

In addition to Kosher certification, MRI's signature sea mineral concentrates harvested from NorthShore, the family's private mineral harvesting operation, are Generally Recognized as Safe (GRAS) and undergo stringent potency, purity and safety testing (microbial and heavy metal testing) both at MRI's Quality Assurance laboratory and independent labs.

About Mineral Resources International, Inc.:

Founded through a parent company formed in 1969 by the Anderson family, Mineral Resources International, Inc. (MRI) (www.mineralresourcesint.com) specializes in developing, manufacturing, and distributing noteworthy nutritional supplements in liquid, tablet, and powder delivery forms, integrating naturally occurring minerals and trace minerals harvested from Utah's Great Salt Lake. Through its close relationship with NorthShore Limited Partnership, its exclusive supplier and the only government-inspected, food-grade, solar-evaporation mineral harvester on the Great Salt Lake, MRI goes to great lengths to ensure an all-natural, GRAS (Generally Recognized as Safe) mineral and trace mineral product while maintaining consistent standardization, concentration, and balance in each lot. MRI manufactures a complete line of innovative dietary supplements ranging from multi-vitamins to targeted nutritional formulas using all-natural ionic minerals. In addition, MRI provides a complete portfolio of natural ionic mineral ingredients for use in supplements, functional beverages and foods. MRI's products are sold worldwide through a variety of distribution channels including natural products and specialty retail stores, salons and estheticians, and natural health care practitioners.
